| Savoiu Valentin | 10 | 9.50 | package declaration does not match with path of classes in the package hierarchy<br>Example:<br>you have **package com.company.Entities**; for class Seat. but actually it should be **package Entities;** based on your package hierarchy<br>Also path of files do not match the package hierrachy.<br>Why not keep the project as it was at creation? Looks like it was copy pasted. | | |
